EXPERIENCE

Catalog Analyst, Amazon - Bangalore
Sep 2021– PRESENT

- 2 years of experience working with data and analytics in a commercial environment, with a focus on pricing and basic SQL skills for data querying and manipulation.

- Reviewed Amazon catalog based on pre-defined guidelines and coordinated with the internal team to fix the issues regarding price and quality related competency.

- Communicated effectively with stakeholders to ensure smooth integration of new functions and innovated ideas for process developments.

- I worked on costing updates and other necessary details about the data chart.

- Attention to detail and report catalog misses to concerned departments for getting them corrected within the ETA.

- I have acquired strong proficiency in working with large datasets and interpreting data.

- Supporting various sales activities and provided coverage during other significant events to stay competitive real time.

- Handling large sets of data on daily basis and manipulating them for optimization before sending for manual consumptions.

- Provides KT & training for the new hires.

- I deliver data-driven reports to higher-ups in the form of data visualization by publishing the work and efforts of my team.
